R v. 25 1948

Tech.

SUBJECT AND TITLE INDEX

	Number	Page
Accuracy of Impedance Measurements. B. Secker	1	74
Adcock Direction Finders:		
Development of Single-Receiver Automatic Adcock Direction-Finders for Use in the Frequency Band 100–150 Megacycles per Second. R. F. Cleaver	4	337
Note on a Short-Range Position-Finding System Using Modulated Continuous Waves. R. F. Cleaver	4	363
Addendum for France-England Submarine Cable (1939) and Paris-Calais Cable, v. 24, n. 1, pp. 24–39; March, 1947	1	73
Aerial Navigation:		
Development of Single-Receiver Automatic Adcock Direction-Finders for Use in the Frequency Band 100–150 Megacycles per Second. R. F. Cleaver	4	337
High-Stability Radio Distance-Measuring Equipment for Aerial Navigation. H. Busignies	3	237
Note on a Short-Range Position-Finding System Using Modulated Continuous Waves. R. F. Cleaver	4	363
Aeronautical Radio:		
Aircraft Radio Communication Set A.R.I. 5272. E. C. Fielding	3	244
Very-High-Frequency Single-Channel Receiver. W. C. Lane and T. C. Clark	2	132
Airline Operations: Intelex—Automatic Reservations. J. D. Mountain and E. M. S. McWhirter	3	220
Airport Receiver: Very-High-Frequency Single-Channel Receiver. W. C. Lane and T. C. Clark	2	132
Allocations, Frequency: International Telecommunication Convention, Atlantic City, 1947. P. E. Erikson	3	232
Alloys: Nickel-Iron Alloy Dust Cores. E. S. Buckley	2	126
Amplifiers:		
Copenhagen Broadcasting House. F. Heegaard and E. Cohrt	2	107
Speech-Input Equipment for New Oslo Broadcasting House. E. Julsrud and G. Weider	1	21
Very-High-Frequency Triode Oscillator and Amplifier Circuits. G. Lehmann	1	50
Amplitude Modulation: Reduction by Limiters of Amplitude Modulation in an Amplitude- and Frequency-Modulated Wave. A. G. Clavier, P. F. Panter, and W. Dite	3	291
Antennas:		
Development of Single-Receiver Automatic Adcock Direction-Finders for Use in the Frequency Band 100–150 Megacycles per Second. R. F. Cleaver	4	337
High Gain with Discone Antennas. A. G. Kandoian, W. Sichak, and R. A. Felsenheld	2	139
Army: Trends in Military Electronic-Equipment Design. N. H. Young	4	334
Articulation: Survey of the Telephone Transmission-Rating Problem. L. C. Pocock	3	256
Atlantic City Convention: International Telecommunication Convention, Atlantic City, 1947. P. E. Erikson	3	232
Attenuation: Heating of Radio-Frequency Cables. W. W. Macalpine	1	84
Automatic Reservations, Intelex—. J. D. Mountain and E. M. S. McWhirter	3	220
Balanced-Bridge Circuits: Mine Detectors and Mine Disposal in France. A. Violet	1	10
Bandwidth:		
Evaluation of Transmission Efficiency According to Hartley's Expression of Information Content. A. G Clavier	4	414
Relationship Between Rate of Transmission of Information, Frequency Bandwidth, and Signal-to-Noise Ratio. C. W. Earp	2	178
Beacons, Radio:		
High-Stability Radio Distance-Measuring Equipment for Aerial Navigation. H. Busignies	3	237
New Developments in Marine Radio Direction Finders. H. Busignies	2	196
Position-Finding by Radio—First Thoughts on the Classification of Systems. C. E. Strong	3	278
Biography:		
Ferdinand Braun—Inventor of the Cathode-Ray Tube. G. Lewis and F. J. Mann	4	319
Etchings of A. K. Erlang (Recent Telecommunication Developments)	4	421
In Memoriam—J. E. Kingsbury	4	422
Blue Titanium Dioxide, Thermo-Electric and Conductive Properties of. H. K. Henisch	2	163
Braun, Ferdinand—Inventor of the Cathode-Ray Tube. G. Lewis and F. J. Mann	4	319
Bridges:		
Accuracy of Impedance Measurements. B. Secker	1	74
Linear Theory of Bridge and Ring Modulator Circuits. V. Belevitch	1	62
Mine Detectors and Mine Disposal in France. A Violet	1	10
Broadcasting Studios:		
Copenhagen Broadcasting House. F. Heegaard and E. Cohrt	2	107
Speech-Input Equipment for New Oslo Broadcasting House. E. Julsrud and G. Weider	1	21
Bureau de l'Union Internationale des Télécommunications: Etchings of A. K. Erlang (Recent Télécommunication Developments)	4	6 421

	Number	Page
Cables, Coaxial:		
Heating of Radio-Frequency Cables. W. W. Macalpine	1	84
Long-Distance Telephone Communication Circuits. A. W. Montgomery	4	386
Cables, Power: Submarine Cables in Norway. C. W. Hirsch	1	3
Capacitance and Conductance Bridge: Accuracy of Impedance Measurements. B. Secker	1	74
Carrier Telephony:		
Emergency Operation of SOJ-12 Carrier Telephone Systems. J. M. Clara and E. S. Calabuig	2	121
Linear Theory of Bridge and Ring Modulator Circuits. V. Belevitch	1	62
Long-Distance Telephone Communication Circuits. A. W. Montgomery	4	386
Cathode-Ray Oscilloscopes:		
Development of Single-Receiver Automatic Adcock Direction-Finders for Use in the Frequency Band 100–150 Megacycles per Second. R. F. Cleaver	4	337
Ferdinand Braun—Inventor of the Cathode-Ray Tube. G. Lewis and F. J. Mann	4	319
Note on a Short-Range Position-Finding System Using Modulated Continuous Waves. R. F. Cleaver	4	363
Cavity Resonators: Very-High-Frequency Triode Oscillator and Amplifier Circuits. G. Lehmann	1	50
Challenger-Responder System: High-Stability Radio Distance-Measuring Equipment for Aerial Navigation. H. Busignies	3	237
Circuit Quality: Survey of the Telephone Transmision-Rating Problem. L. C. Pocock	3	256
Circular Wave Guides with Two Coaxial Dielectrics, $TM_{0,1}$ Mode in. (With Discussion.) S. Frankel	2	152
Classification of Systems, Position-Finding by Radio—First Thoughts on the. C. E. Strong	3	278
Clipping: Reduction by Limiters of Amplitude Modulation in an Amplitude- and Frequency-Modulated Wave. A. G. Clavier, P. F. Panter, and W. Dite	3	291
Clock: Portable Crystal-Controlled Frequency Standard. R. I. B. Cooper	1	30
Coaxial:		
Amplifiers: Very-High-Frequency Triode Oscillator and Amplifier Circuits. G. Lehmann	1	50
Cables: Heating of Radio-Frequency Cables. W. W. Macalpine	1	84
Carrier Telephony: Long-Distance Telephone Communication Circuits. A. W. Montgomery	4	386
Dielectrics: $TM_{0,1}$ Mode in Circular Wave Guides with Two Coaxial Dielectrics. (With Discussion.) S. Frankel	2	152
Coils: Nickel-Iron Alloy Dust Cores. E. S. Buckley	2	126
Comité Consultatif International: International Telecommunication Convention, Atlantic City, 1947. P. E. Erikson	3	232
Components: Trends in Military Electronic-Equipment Design. N. H. Young	4	334
Conductive Properties of Blue Titanium Dioxide, Thermo-Electric and. H. K. Henisch	2	163
Continuous Waves, Note on a Short-Range Position-Finding System Using Modulated. R. F. Cleaver	4	363
Control Desks:		
Copenhagen Broadcasting House. F. Heegaard and E. Cohrt	2	107
Speech-Input Equipment for New Oslo Broadcasting House. E. Julsrud and G. Weider	1	21
Control Station Apparatus. C. G. White	1	43
Convention, Atlantic City, 1947, International Telecommunication. P. E. Erikson	3	232
Coordination: International Telecommunication Convention, Atlantic City, 1947. P. E. Erikson	3	232
Copenhagen Broadcasting House. F. Heegaard and E. Cohrt	2	107
Copperweld, Story of	4	328
Cores, Nickel-Iron Alloy Dust. E. S. Buckley	2	126
Creed No. 47 Teleprinter (Recent Telecommunication Developments)	4	421
Crystal Control: Portable Crystal-Controlled Frequency Standard. R. I. B. Cooper	1	30
Curie Point: Thermomagnetic Generator. L. Brillouin and H. P. Iskenderian	3	300
Degassing: Design of an Ionization Manometer Tube. D. L. Hollway	4	373
Design:		
Design of an Ionization Manometer Tube. D. L. Hollway	4	373
Trends in Military Electronic-Equipment Design. N. H. Young	4	334
Detectors, Mine: Mine Detectors and Mine Disposal in France. A. Violet	1	10
Development of Single-Receiver Automatic Adcock Direction-Finders for Use in the Frequency Band 100–150 Megacycles per Second. R. F. Cleaver	4	337
Dielectrics: Heating of Radio-Frequency Cables. W. W. Macalpine	1	84
Direction Finders:		
Development of Single-Receiver Automatic Adcock Direction-Finders for Use in the Frequency Band 100–150 Megacycles per Second. R. F. Cleaver	4	337
New Developments in Marine Radio Direction Finders. H. Busignies	2	196
Note on a Short-Range Position-Finding System Using Modulated Continuous Waves. R. F. Cleaver	4	363
Position-Finding by Radio—First Thoughts on the Classification of Systems. C. E. Strong	3	278

INDEX TO VOLUME 25

	Number	Page
Discone Antennas:		
High Gain with Discone Antennas. A. G. Kandoian, W. Sichak, and R. A. Felsenheld	2	139
High-Stability Radio Distance-Measuring Equipment for Aerial Navigation. H. Busignies	3	237
Distance-Measuring Equipment:		
High Gain with Discone Antennas. A. G. Kandoian, W. Sichak, and R. A. Felsenheld	2	139
High-Stability Radio Distance-Measuring Equipment for Aerial Navigation. H. Busignies	3	237
Distribution Networks, Power:		
Control Station Apparatus. C. G. White	1	43
Remote Control. C. G. White	1	35
Divider, High-Ratio Multivibrator Frequency. M. Silver and A. Shadowitz	2	160
Dust Cores, Nickel-Iron Alloy. E. S. Buckley	2	126
Economics:		
Long-Distance Telephone Communication Circuits. A. W. Mongtomgery	4	386
Survey of the Telephone Transmission-Rating Problem. L. C. Pocock	3	256
Efficiency According to Hartley's Expression of Information Content, Evaluation of Transmission. A. G. Clavier	4	414
Electrolytic-Iron Cores: Nickel-Iron Alloy Dust Cores. E. S. Buckley	2	126
Electromagnetic Theory:		
Modern Demonstration of MacDonald's Equivalence Theorem. A. G. Clavier	2	148
Simplified Procedure for Computing Behavior of Multiconductor Lossless Transmission Lines. S. Frankel	3	286
Electronic-Equipment Design, Trends in Military. N. H. Young	4	334
Elliptic Radiolocation Systems: Position-Finding by Radio—First Thoughts on the Classification of Systems	3	278
Emergency Operation of SOJ-12 Carrier Telephone Systems. J. M. Clara and E. S. Calabuig	2	121
Equivalence Theorem, Modern Demonstration of MacDonald's. A. G. Clavier	2	148
Erlang, A. K., Etchings of, (Recent Telecommunication Developments)	4	421
Errors, Direction-Finder: Development of Single-Receiver Automatic Adcock Direction-Finders for Use in the Frequency Band 100–150 Megacycles per Second. R. F. Cleaver	4	337
Etchings of A. K. Erlang (Recent Telecommunication Developments)	4	421
Evaluation of Transmission Efficiency According to Hartley's Expression of Information Content. A. G. Clavier	4	414
Expanded-Band Modulation: Relationship Between Rate of Transmission of Information, Frequency Bandwidth, and Signal-to-Noise Ratio. C. W. Earp	2	178
Exchange, Zurich Automatic Tandem Toll. G. Klingelfuss	2	113
Federal Telecommunication Laboratories, Incorporated: Modern Research Facilities of Federal Telecommunication Laboratories. H. H. Buttner	3	211
Feedback: Very-High-Frequency Triode Oscilator and Amplifier Circuits. G. Lehmann	1	50
Ferdinand Braun—Inventor of the Cathode-Ray Tube. G. Lewis and F. J. Mann	4	319
Ferromagnetism:		
Nickel-Iron Alloy Dust Cores. E. S. Buckley	2	126
Thermomagnetic Generator. L. Brillouin and H. P. Iskenderian	3	300
Fields, Electromagnetic: Modern Demonstration of MacDonald's Equivalence Theorem. A. G. Clavier	2	148
Filters: Linear Theory of Bridge and Ring Modulator Circuits. V. Belevitch	1	62
Flood: Emergency Operation of SOJ-12 Carrier Telephone Systems. J. M. Clara and E. S. Calabuig	2	121
Frequency Allocations: International Telecommunication Convention, Atlantic City, 1947. P. E. Erikson	3	232
Frequency Divider, High-Ratio Multivibrator. M. Silver and A. Shadowitz	2	160
Frequency Modulation:		
Evaluation of Transmission Efficiency According to Hartley's Expression of Information Content. A. G. Clavier	4	414
Reduction by Limiters of Amplitude Modulation in an Amplitude- and Frequency-Modulated Wave. A. G. Clavier, P. F. Panter, and W. Dite	3	291
Relationship Between Rate of Transmission of Information, Frequency Bandwidth, and Signal-to-Noise Ratio. C. W. Earp	2	178
Frequency-Sharing Multiplex: Position-Finding by Radio—First Thoughts on the Classification of Systems. C. E. Strong	3	278
Frequency Standard, Portable Crystal-Controlled. R. I. B. Cooper	1	30
Frequency Transposition: Long-Distance Telephone Communication Circuits. A. W. Monggomery	4	386
Gas Pressure: Design of an Ionization Manometer Tube. D. L. Hollway	4	373
Generator, Thermomagnetic. L. Brillouin and H. P. Iskenderian	3	300
Gravity Measurements: Portable Crystal-Controlled Frequency Standard. R. I. B. Cooper	1	30
Grid-Bell Feedback: Very-High-Frequency Triode Oscillator and Amplifier Circuits. G. Lehmann	1	50

	Number	Page
Ground Beacons (see also Beacons, Radio): High-Stability Radio Distance-Measuring Equipment for Aerial Navigation. H. Busignies	3	237
Gauges: Design of an Ionization Manometer Tube. D. L. Hollway	4	373
Hartley's Expression of Information Content, Evaluation of Transmission Efficiency According to. A. G. Clavier	4	414
Heating of Radio-Frequency Cables. W. W. Macalpine	1	84
High Frequencies: Heating of Radio-Frequency Cables. W. W. Macalpine	1	84
High Gain with Discone Antennas. A. G. Kandoian, W. Sichak, and R. A. Felsenheld	2	139
High-Ratio Multivibrator Frequency Divider. M. Silver and A. Shadowitz	2	160
High-Stability Radio Distance-Measuring Equipment for Aerial Navigation H. Busignies	3	237
Historical:		
Ferdinand Braun—Inventor of the Cathode-Ray Tube. G. Lewis and F. J. Mann	4	319
Story of Copperweld	4	328
Hyperbolic Radiolocation Systems: Position-Finding by Radio—First Thoughts on the Classification of Systems	3	278
Image Superposition, Optical: Development of Single-Receiver Automatic Adcock Direction-Finders for Use in the Frequency Band 100–150 Megacycles per Second. R. F. Cleaver	4	337
Impedance Measurements, Accuracy of. B. Secker	1	74
Index of Modulation: Reduction by Limiters of Amplitude Modulation in an Amplitude- and Frequency-Modulated Wave. A. G. Clavier, P. F. Panter, and W. Dite	3	291
Indicator, Direction-Finder:		
Development of Single-Receiver Automatic Adcock Direction-Finders for Use in the Frequency Band 100–150 Megacycles per Second. R. F. Cleaver	4	337
Note on a Short-Range Position-Finding System Using Modulated Continuous Waves. R. F. Cleaver	4	363
Inductance:		
Accuracy of Impedance Measurements. B. Secker	1	74
Bridges: Mine Detectors and Mine Disposal in France. A Violet	1	10
Nickel-Iron Alloy Dust Cores. E. S. Buckley	2	126
Information, Transmission of: Evaluation of Transmission Efficiency According to Hartley's Expression of Information Content. A. G. Clavier	4	414
In Memoriam—J. E. Kingsbury	4	422
Intelex—Automatic Reservations. J. D. Mountain and E. M. S. McWhirter	3	220
Intelligibility: Survey of the Telephone Transmission-Rating Problem. L. C. Pocock	3	256
International Telecommunication Convention, Atlantic City, 1947. P. E. Erikson	3	232
Ionization Manometer Tube, Design of an. D. L. Hollway	4	373
Iron Alloy Dust Cores, Nickel-. E. S. Buckley	2	126
Jarama River Crossing: Emergency Operation of SOJ-12 Carrier Telephone Systems. J. M. Clara and E. S. Calabuig	2	121
Kingsbury, J. E., In Memoriam	4	422
Laboratories: Modern Research Facilities of Federal Telecommunication Laboratories. H. H. Buttner	3	211
Life, Guaranteed: Trends in Military Electronic-Equipment Design. N. H. Young	4	334
Linear Theory of Bridge and Ring Modulator Circuits. V. Belevitch	1	62
Line Plant:		
Emergency Operation of SOJ-12 Carrier Telephone Systems. J. M. Clara and E. S. Calabuig	2	121
Story of Copperweld	4	328
Loading: Nickel-Iron Alloy Dust Cores. E. S. Buckley	2	126
Locked Frequencies: High-Rate Multivibrator Frequency Divider. M. Silver and A. Shadowitz	2	160
Long-Distance Telephony:		
Long-Distance Telephone Communication Circuits. A. W. Montgomery	4	386
Survey of the Telephone Transmission-Rating Problem. L. C. Pocock	3	256
Loop Coupling: Simplified Procedure for Computing Behavior of Multiconductor Lossless Transmission Lines. S. Frankel	3	286
Loran: New Developments in Marine Radio Direction Finders. H. Busignies	2	196
Lossless Transmission Lines, Simplified Procedure for Computing Behavior of Multiconductor. S. Frankel	3	286
MacDonald's Equivalence Theorem, Modern Demonstration of. A. G. Clavier	2	148
Machine Switching:		
Control Station Apparatus. C. G. White	1	43
Copenhagen Broadcasting House. F. Heegaard and E. Cohrt	2	107
Speech-Input Equipment for New Oslo Broadcasting House. E. Julsrud and G. Weider	1	21
Zurich Automatic Tandem Toll Exchange. G. Klingelfuss	2	113

INDEX TO VOLUME 25

	Number	Page
Madrid-Barcelona Circuit: Emergency Operation of SOJ-12 Carrier Telephone Systems. J. M. Clara and E. S. Calabuig	2	121
Madrid Convention, 1932: International Telecommunication Convention, Atlantic City, 1947. P. E. Erikson	3	232
Magnetism:		
Nickel-Iron Alloy Dust Cores. E. S. Buckley	2	126
Thermomagnetic Generator. L. Brillouin and H. P. Iskenderian	3	300
Manometer Tube, Design of an Ionization. D. L. Hollway	4	373
Manufacture:		
Aircraft Radio Communication Set A.R.I. 5272. E. C. Fielding	3	244
Story of Copperweld	4	328
Trends in Military Electronic-Equipment Design. N. H. Young	4	334

Quartz Crystals: Portable Crystal-Controlled Frequency Standard. R. I. B. Cooper	1	30

INDEX TO VOLUME 25

	Number	Page
Radar:		
Development of Single-Receiver Automatic Adcock Direction-Finders for Use in the Frequency Band 100–150 Megacycles per Second. R. F. Cleaver	4	337
New Developments in Marine Radio Direction Finders. H. Busignies	2	196
Position-Finding by Radio—First Thoughts on the Classification of Systems. C. E. Strong	3	278
Radio Beacons:		
High-Stability Radio Distance-Measuring Equipment for Aerial Navigation. H. Busignies	3	237
New Developments in Marine Radio Direction Finders. H. Busignies	2	196
Position-Finding by Radio—First Thoughts on the Classification of Systems. C. E. Strong	3	278
Radiolocation (see also Radar): Position-Finding by Radio—First Thoughts on the Classification of Systems. C. E. Strong	3	278
Rate of Transmission of Information, Frequency Bandwidth, and Signal-to-Noise Ratio, Relationship Between. C. W. Earp	2	178
Receivers:		
Aeronautical Transmitter-: Aircraft Radio Communication Set A.R.I. 5272. E. C. Fielding	3	244
Direction-Finder: Development of Single-Receiver Automatic Adcock Direction-Finders for Use in the Frequency Band 100–150 Megacycles per Second. R. F. Cleaver	4	337
Very-High-Frequency Single-Channel Receiver. W. C. Lane and T. C. Clark	2	132
Rectification:		
Thermo-Electric and Conductive Properties of Blue Titanium Dioxide. H. K. Henisch	2	163
Type Modulators: Linear Theory of Bridge and Ring Modulator Circuits. V. Belevitch	1	62
Reduction by Limiters of Amplitude Modulation in an Amplitude- and Frequency-Modulated Wave. A. G. Clavier, P. F. Panter, and W. Dite	3	291
Relationship Between Rate of Transmission of Information, Frequency Bandwidth, and Signal-to-Noise Ratio. C. W. Earp	2	178
Remote Control:		
Control Station Apparatus. C. G. White	1	43
Remote Control. C. G. White	1	35
Repeaters:		
Carrier-Frequency: Long-Distance Telephone Communication Circuits. A. W. Montgomery	4	386
Switched: Zurich Automatic Tandem Toll Exchange. G. Klingelfuss	2	113
Repetition Rate: Survey of the Telephone Transmission-Rating Problem. L. C. Pocock	3	256
Reservations, Intelex—Automatic. J. D. Mountain and E. M. S. McWhirter	3	220
Resonators, Cavity: Very-High-Frequency Triode Oscillator and Amplifier Circuits. G. Lehmann	1	50
Ring Modulator, Linear Theory of Bridge and. V. Belevitch	1	62
Rotary Automatic System: Zurich Automatic Tandem Toll Exchange. G. Klingelfuss	2	113
R-θ Navigation System:		
High-Stability Radio Distance-Measuring Equipment for Aerial Navigation. H. Busignies	3	237
Note on a Short-Range Position-Finding System Using Modulated Continuous Waves. R. F. Cleaver	4	363
Saturation: Reduction by Limiters of Amplitude Modulation in an Amplitude- and Frequency-Modulated Wave. A. G. Clavier, P. F. Panter, and W. Dite	3	291
Schering Bridge: Accuracy of Impedance Measurements. B. Secker	1	74
Semiconductors: Thermo-Electric and Conductive Properties of Blue Titanium Dioxide. H. K. Henisch	2	163
Series-Impedance Bridge: Accuracy of Impedance Measurements. B. Secker	1	74
Shielded Buildings: Modern Research Facilities of Federal Telecommunication Laboratories. H. H. Buttner	3	211
Short-Range Position-Finding System Using Modulated Continuous Waves, Note on a. R. F. Cleaver	4	363
Signaling: Control Station Apparatus. C. G. White	1	43
Signal-to-Noise Ratio:		
Evaluation of Transmission Efficiency According to Hartley's Expression of Information Content. A. G. Clavier	4	414
Relationship Between Rate of Transmission of Information, Frequency Bandwidth, and Signal-to-Noise Ratio. C. W. Earp	2	178
Simplified Procedure for Computing Behavior of Multiconductor Lossless Transmission Lines. S. Frankel	3	286
Single-Receiver Automatic Adcock Direction-Finders for Use in the Frequency Band 100–150 Megacycles per Second, Development of. R. F. Cleaver	4	337
Slow Waves in Cylindrical Guides: $TM_{0,1}$ Mode in Circular Wave Guides with Two Coaxial Dielectrics. (With Discussion.) S. Frankel	2	152
SOJ-12 Carrier Telephone Systems, Emergency Operation of. J. M. Clara and E. S. Calabuig	2	121
Speech-Input Equipment for New Oslo Broadcasting House. E. Julsrud and G. Weider	1	21
Squelch Circuit: Very-High-Frequency Single-Channel Receiver. W. C. Lane and T. C. Clark	2	132

	Number	Page
Standing Waves:		
Heating of Radio-Frequency Cables. W. W. Macalpine	1	84
High Gain with Discone Antennas. A. G. Kandoian, W. Sichak, and R. A. Felsenheld	2	139
Simplified Procedure for Computing Behavior of Multiconductor Lossless Transmission Lines. S. Frankel	3	286
Step Modulation: Relationship Between Rate of Transmission of Information, Frequency Bandwidth, and Signal-to-Noise Ratio. C. W. Earp	2	178
Story of Copperweld	4	328
S.T.R.-9 Aircraft Radio: Aircraft Radio Communication Set A.R.I. 5272. E. C. Fielding	3	244
Studios, Broadcasting:		
Copenhagen Broadcasting House. F. Heegaard and E. Cohrt	2	107
Speech-Input Equipment for New Oslo Broadcasting House. E. Julsrud and G. Weider	1	21
Subassemblies:		
Aircraft Radio Communication Set A.R.I. 5272. E. C. Fielding	3	244
Trends in Military Electronic-Equipment Design. N. H. Young	4	334
Submarine Cables in Norway. C. W. Hirsch	1	3
Substations, Power:		
Control Station Apparatus. C. G. White	1	43
Remote Control. C. G. White	1	35
Super-High Frequencies: High-Stability Radio Distance-Measuring Equipment for Aerial Navigation. H. Busignies	3	237
Supervisory Control:		
Control Station Apparatus. C. G. White	1	43
Remote Control. C. G. White	1	35
Survey of the Telephone Transmission-Rating Problem. L. C. Pocock	3	256
Synchronization: High-Ratio Multivibrator Frequency Divider. M. Silver and A. Shadowitz	2	160
Systems, Telephone:		
Long-Distance Telephone Communication Circuits. A. W. Montgomery	4	386
Survey of the Telephone Transmission-Rating Problem. L. C. Pocock	3	256
Tandem Toll Exchange, Zurich Automatic, G. Klingelfuss	2	113
Telecommunication Convention, Atlantic City, 1947, International. P. E. Erikson	3	232
Telemetering: Control Station Apparatus. C. G. White	1	43
Teleprinter Network: Intelex—Automatic Reservations. J. D. Mountain and E. M. S. McWhirter	3	220
Teleprinters: Creed No. 47 Teleprinter (Recent Telecommunication Developments)	4	421
TEM Mode: Simplified Procedure for Computing Behavior of Multiconductor Lossless Transmission Lines. S. Frankel	3	286
Temperature Effects: Thermomagnetic Generator. L. Brillouin and H. P. Iskenderian	3	300
Terminations, Filter: Linear Theory of Bridge and Ring Modulator Circuits. V. Belevitch	1	62
Thermal Flow: Heating of Radio-Frequency Cables. W. W. Macalpine	1	84
Thermo-Electric and Conductive Properties of Blue Titanium Dioxide. H. K. Henisch	2	163
Thermomagnetic Generator. L. Brillouin and H. P. Iskenderian	3	300
Time-Sharing:		
Frequency Modulation: Relationship Between Rate of Transmission of Information, Frequency Bandwidth, and Signal-to-Noise Ratio. C. W. Earp	2	178
Multiplex: Position-Finding by Radio—First Thoughts on the Classification of Systems. C. E. Strong	3	278
Titanium Dioxide, Thermo-Electric and Conductive Properties of Blue. H. K. Henisch	2	163
$TM_{0,1}$ Mode in Circular Wave Guides with Two Coaxial Dielectrics. (With Discussion.) S. Frankel	2	152
Toll Circuits:		
Emergency Operation of SOJ-12 Carrier Telephone Systems. J. M. Clara and E. S. Calabuig	2	121
Long-Distance Telephone Communication Circuits. A. W. Montgomery	4	386
Zurich Automatic Tandem Toll Exchange. G. Klingelfuss	2	113
Tower: Modern Research Facilities of Federal Telecommunication Laboratories. H. H. Buttner	3	211
Transmission Efficiency: Evaluation of Transmission Efficiency According to Hartley's Expression of Information Content. A. G. Clavier	4	414
Transmission Lines:		
Heating of Radio-Frequency Cables. W. W. Macalpine	1	84
Simplified Procedure for Computing Behavior of Multiconductor Lossless Transmission Lines. S. Frankel	3	286
Transmission-Rating Problem, Survey of the Telephone. L. C. Pocock	3	256
Transmitter-Receiver, Aeronautical: Aircraft Radio Communication Set A.R.I. 5272. E. C. Fielding	3	244
Transponders: Note on a Short-Range Position-Finding System Using Modulated Continuous Waves. R. F. Cleaver	4	363
Trends in Military Electronic-Equipment Design. N. H. Young	4	334
Triodes: Very-High-Frequency Triode Oscillator and Amplifier Circuits. G. Lehmann	1	50

	Number	Page
Trunking: Zurich Automatic Tandem Toll Exchange. G. Klingelfuss	2	113
Two-Wire Lines: Simplified Procedure for Computing Behavior of Multiconductor Lossless Transmission Lines. S. Frankel	3	286
Ultra-High Frequencies:		
Development of Single-Receiver Automatic Adcock Direction-Finders for Use in the Frequency Band 100–150 Megacycles per Second. R. F. Cleaver	4	337
Note on a Short-Range Position-Finding System Using Modulated Continuous Waves. R. F. Cleaver	4	363
Unit Construction: See Subassemblies.		
Trends in Military Electronic-Equipment Design. N. H. Young	4	334
Vacuum Measurements: Design of an Ionization Manometer Tube. D. L. Hollway	4	373
Vacuum Tubes:		
Design of an Ionization Manometer Tube. D. L. Hollway	4	373
Ferdinand Braun—Inventor of the Cathode-Ray Tube. G. Lewis and F. J. Mann	4	319
Very-High-Frequency Triode Oscillator and Amplifier Circuits. G. Lehmann	1	50
Very-High Frequencies:		
Aircraft Radio Communication Set A.R.I. 5272. E. C. Fielding	3	244
Very-High-Frequency Single-Channel Receiver. W. C. Lane and T. C. Clark	2	132
Very-High-Frequency Triode Oscillator and Amplifier Circuits. G. Lehmann	1	50
Voice-Frequency Continuous Telemetering: Control Station Apparatus. C. G. White	1	43
Wave Guides: $TM_{0,1}$ Mode in Circular Wave Guides with Two Coaxial Dielectrics. (With Discussion.) S. Frankel	2	152
Wide-Band Antennas: High Gain with Discone Antennas. A. G. Kandoian, W. Sichak, and R. A. Felsenheld	2	139
Wire: Story of Copperweld	4	328
Zurich Automatic Tandem Toll Exchange. G. Klingelfuss	2	113
47 Teleprinter, Creed No. (Recent Telecommunication Developments)	4	421
100–150 Megacycles per Second, Development of Single-Receiver Automatic Adcock Direction-Finders for Use in the Frequency Band. R. F. Cleaver	4	337
